Atlona Offers Six Month Trial of Remote Access for Velocity Control Systems

Experience Atlona's online resource for remote configuration, management, and control for six months with Velocity gateway purchases through the remainder of 2023

SAN JOSE, California, June 22, 2023 – [Atlona](#) has announced a promotion for its **Velocity Premier Services – Remote Gateway (AT-VPS-RG)** that unlocks six months of access to the powerful online resource. Effective immediately, every Velocity gateway purchased through the end of the year is eligible for a 180-day VPS-RG demo license at no charge.

Atlona launched the promotion so that new Velocity customers, and existing Velocity users scaling their installations, can experience the power of remote access for reducing costs and increasing responsiveness in the following areas:

- Eliminate truck rolls for system configuration, troubleshooting and maintenance
- Quickly address support issues without the need to dispatch a technician to the room
- Safely store gateway configurations in the cloud
- Streamline credential and firmware updates

“We are convinced that integrators and large end users can increase revenues through service contracts, lower costs by reducing site/room visits, and provide faster support response with remote access to Velocity systems,” says Justin Kennedy, Product Manager, Atlona. “By offering a trial of Velocity Premier Services – Remote Gateway, we are providing a risk-free way for them to experience the benefits firsthand.”

Using patent-pending cloud technology, VPS-RG establishes a secure proxy connection between a server and the gateway over the internet. From any device with a browser, users can remotely access the gateway for system and device configuration, troubleshooting, maintenance, credential and firmware updates, and more. The online dashboard provides centralized access for managing multiple gateways as well as storage of system backups in the cloud. The result is a more efficient and reliable method to service and support end users. Velocity Premier Services Remote Gateway

is available as an annual license for each gateway to be controlled, with three tiered levels of service to match the processing and data requirements of specific Atlona Velocity gateways.

Velocity customers can learn more about the 180-day free VPS-RG demo license and qualifying equipment at <https://atlona.com/freerg>. For more information on the VPS-RG, please visit www.atlona.com/VPS-RG.

About Atlona

Atlona, a Panduit company, is a leading manufacturer of AV distribution, AV over IP, collaboration, and control solutions. Our core brand vision is to improve technology for the sharing of ideas, through innovative AV products used every day in a wide variety of commercial and educational applications.
