

## AT-UHD-CAT Updating Guide

**Note:** Only use a Windows computer to update. Use of an Apple computer to update will cause the device to be unusable until a Windows computer is used to update.

Requirements:

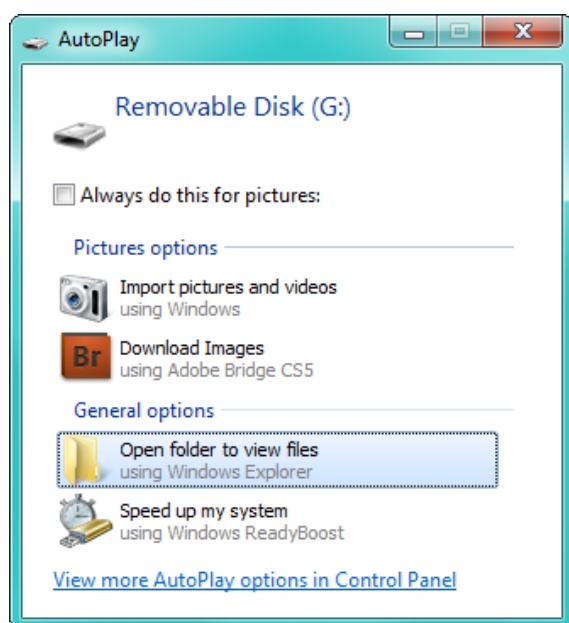

- AT-UHD-CAT w/ power supply
- Desktop PC or Laptop PC w/ USB B port
- Mini USB to USB A cable

Putting the unit into update mode:

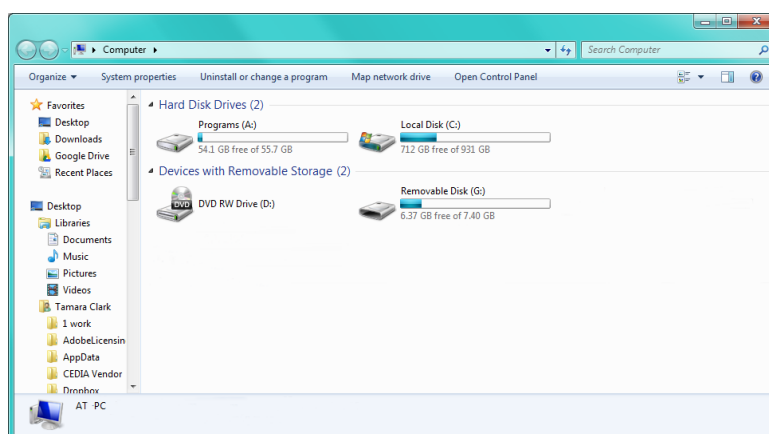

- Unplug the power from the UHD-CAT
- Connect UHD-CAT to a computer using the mini USB to USB A cable
- Press and hold the POWER key
- Plug the power back into the UHD-CAT (while still holding the POWER key)
- Continue holding the POWER key for 5 seconds then release it

Updating

- Click the option, "Open folder to view files" (if AutoPlay runs)

If the computer does not auto detect the connection, open "My Computer" and select the USB drive.

- Place the latest firmware in the folder (if there is already a file in the folder, delete it)
- Remove the USB cable from the UHD-CAT and computer
- Unplug the power cable from the UHD-CAT
- Plug the power cable back in

The update process is complete and the switcher is ready to be used
