

# Version Information

Version	Release Date	Notes
1	Jan 2025	Release

## Integration Note

For MaxHub integration with Velocity, MaxHub must be fully set up and on the same network or subnet. The devices must be able to speak to each other. Velocity needs to have a site and room created before starting integration with the MaxHub.

- 1. Open Teams on the MaxHub dedicated control panel.
- 2. Accept the EULA.

3. Set up the Microsoft Teams room with either the verification code or manual setup (email and password).

nji (	App version 52.113.0 Windows version 10.0296	1.4602 Provisioning version 15	Account	,	Upp version 52.115.0 Windows version 10.0.22611.6662 Provisioning version 15
			Email example@example.com Password Password		
	Set up Microsoft Teams Room account Put in the verification code to this room that was sent.				
		Manual setup			Back Finish

- 4. If the room and device are not fully set up, it will process to a new waiting screen. Select the Settings button, a pop up will appear.
- 5. Enter the admin username and password, then press the Yes button.

#### Integration Note

- 6. It will automatically go to the About page. Find and write down the IP v4 address of the panel.
- 7. Select Account from the side menu. The new screen will display a username and protected password.
