Integration Note

Velocity is an easy to use control system, designed to ensure all devices can be integrated into a system without a large amount of programming needed. To make integration with Zoom Room® products simpler, Velocity an be linked to a Zoom Room via IP.

NOTE: Currently Zoom Room camera controls, video recording/capture are not compatible with Velocity.

1. Install the Zoom Room App onto a MAC to be used.

NOTE: The Zoom Room MAC must be on OS X, OS 10.9, or higher to work with Velocity.

2. Connect all Zoom Room devices to the MAC.

3. Log into the Zoom Rooms account at zoom.us

4. Select the Edit button next to the correct Zoom Room (if there are multiples).

5. Ensure Enable Control System API and Allow SSH connections are set to ON.

6. Get the passcode to enter into Velocity.
7. Open a browser on the local computer and enter in Velocity’s IP address.

8. Log into Velocity

9. Select the room or Zoom Room from the = menu.

10. Select the + (add) button within the room. A new navigation will slide open.
11. Type Zoom into the search field and press the SEARCH button.

12. Press the “Quick Add” button next to Zoom: Teleconference: Zoom Room: Zoom Room Software. The device will appear in the main room screen.

13. Add a monitor to the room.

14. Select EDIT on the Zoom Room.

15. Add the IP of the MAC into the Zoom Room.

16. Select the monitor as the Zoom Room output.

17. Enter the Zoom user name and password into the fields if the username and password has changed from the default. Default Username: zoom and Password: zoomus123

18. Press Save. Connections will auto update the devices for MIC, camera, etc based on Zoom connections.
19. Press the Launch Control icon.

20. Select Conference to launch Zoom Room.

**Zoom Room Controls and Options**

Zoom room will open to the contacts page. Here contacts can be called and meetings started. Select **Meet Now** to launch a meeting.
Meeting List
Select the Meeting List icon on the left side of Zoom Room. If there are any meetings it will display on the screen. If there are no meetings a no upcoming meetings message will show on the screen.

Join Meeting
Select the Join icon on the left side of Zoom Room. Use the dialer that comes up to enter the meeting ID number. The Join button will turn grey once a meeting ID has been entered.

Settings
- **Room Settings:** Will display room name, meeting ID number, room email, Zoom Room platform, and OS.
- **Microphone:** This should auto populate with the Zoom Room devices, if it does not or if a different MIC should be used, it can be chosen from the drop down menu.
- **Speaker:** If the speaker is not automatically selected or a new one is in use, it can be chosen from the drop down menu.
- **Camera:** If the camera is not selected or a new one is in use, it can be chosen from the drop down menu.
Meeting

Once a meeting has been started or joined, it will open to a new screen. The Zoom Room page allows the MIC to be muted and participants managed/invited. Use the different icons to make meeting adjustments.

**NOTE:** At this time Velocity does not have integrated Zoom camera control. For camera control, add the camera as a device inside of the room and create macros for each camera control needed. View the Velocity User Manual found on atlona.com for instructions on setting up macros.

**Mute Microphone** - Use this to mute and unmute the room microphone.

**Stop Video** - Use this to turn the selected Zoom Room camera on and off.

**NOTE:** If the AT-HDVS-CAM is being used as the Zoom Room camera, this button will mute and unmute the camera video.

**Share Content** - Streaming is not currently supported in the Velocity interface. This button will open a new pop up that will provide a link to the Zoom content share page.

**Manage Participants** - A new pop up will appear when selecting this button. The screen will allow participants’ audio to be muted and unmuted.
**Integration Note**

**Invite** - A new screen will take over when selecting Invite. Invites can be done by contacts (either user or room) or by Email.
- **Contacts** - Select all users or rooms for invite and press the Invite button. The invite button will turn green when a contact has been selected.
- **Email** - Type in the Email address of the person to be invited and then press the Send Email link. A pop up will appear to say the invite has been sent.
- **Invite Room System** - At this time H.323/SIP inviting is not supported at this time.

![Invite Image]

**Start Recording** - Future feature. At this time Velocity does not support Zoom Room meeting recording.

![Start Recording Image]

**Settings** - A new window will open when Settings is selected. Within the settings window the microphone, speaker, and camera can be selected.

![Settings Image]

**Volume Bar** - Use the slider to adjust the meeting audio up and down.

![Volume Bar Image]

**Leave** - A new window will open when Leave is selected.
- **End** - If the meeting is being hosted by the current zoom room, this will end the meeting for all the participants.
- **Leave** - This will end the meeting for the current room only, the meeting will continue for the rest of the participants.
- **Cancel** - If the leave button was pressed by accident, cancel will return the user to the meeting.
