Atlona Reduces Price of Velocity AV Control and Room Scheduling Touch Panels

SAN JOSE, California, December 19, 2022 – Atlona heads into the holiday season with a new price list for Velocity AV control and room scheduling touch panels. Price reductions for three specific products – the **AT-VTP-800**, **AT-VSP-800** and **AT-VTP-550** – range from 12 to 40 percent, easing the budgeting process for installers and end users seeking premium in-room control products at an affordable price.

Velocity is an innovative IP-based AV control platform that allows a single, networked processor to serve multiple AV systems simultaneously. With the ability to configure control systems in minutes and quickly makes system adjustments free of extensive programming, Velocity saves valuable time for installers. The three Velocity touch panels, available in black and white, are PoE-powered with fast, automatic network discovery and configuration by Velocity hardware or software server gateways.

“These price reductions, effective immediately, bring both relief and additional value to our customers as they reconcile their 2022 budgets and finalize plans for 2023,” said Justin Kennedy, Product Manager, Atlona. “We aim to bring the benefits of Velocity touch panels to a much broader customer base that want the increased functionality and flexibility that premium touch panel solutions offer for modern collaboration rooms.”

Velocity touch panels are ideal for meeting spaces, lobbies, hallways, and other settings in government, enterprise, educational facilities, and public institutions. The 8-inch AT-VTP-800 and 5.5-inch AT-VTP-550 touch panels provide integrated AV control and room scheduling capability, while the AT-VSP-800 offers a streamlined, focused room scheduling solution. All feature 1280×800 native resolution and a capacitive glass surface that supports multi-touch and gesture interactions.

About Atlona

Atlona, a Panduit company, is a leading manufacturer of AV distribution, AV over IP, collaboration, and control solutions. Our core brand vision is to improve technology for the sharing of ideas, through innovative AV products used every day in a wide variety of commercial and educational

applications. Atlona prioritizes quality, user experience, simplicity, and management in every product we develop. More information about Atlona is available at atlona.com.

About Panduit

Global connectivity leader Panduit Corp. creates innovative electrical and network infrastructure solutions for applications across the enterprise. Headquartered in Tinley Park, Ill. and operating in 112 worldwide locations, Panduit's technology leadership and robust ecosystem help support, sustain, and empower business growth in a connected world. panduit.com
