Atlona Announces Integration with Q-SYS Platform

SAN JOSE and COSTA MESA, CA, June 13, 2017 – Atlona and QSC, LLC announce a collaboration to co-develop plug-ins for the [Q-SYS™ Platform](#). These plug-ins provide networked audio stream compatibility with Atlona [OmniStream™ AVoIP](#) products, and offer direct system control for [CLSO Series video switchers](#). This integration will be on display in the QSC booth (#5645) and Atlona booth (#3961) at InfoComm 2017.

The OmniStream plug-in allows the Q-SYS Platform to ingest a direct audio stream from encoders as it does for any other input, and Q-SYS can process, route and mix those audio channels anywhere on the network. The CLSO Series plug-in enables direct control of switcher operations from within Q-SYS user control interface.

“Atlona is an ideal partner for QSC as they offer a solid and reliable video distribution infrastructure that pairs perfectly with Q-SYS,” says Mike Brandes, Product Manager, Installed Systems for QSC. “One of the key capabilities of the Q-SYS Platform is its unique ability to easily integrate with third-party devices. These plug-ins offer cutting-edge, native integration for Atlona products for corporate enterprise environments.”

“We are very excited to partner with QSC and deliver solutions that minimize complexity for the integrator,” says David Shamir, Director of Product Management for Atlona. “Our best-in-class OmniStream platform and CLSO Series are now enhanced by adding easy and direct control through one of the most powerful IT-based platforms in industry.”

InfoComm 2017

At InfoComm, both QSC (booth #5645) and Atlona (booth #3961) will demonstrate these plug-ins and allow visitors to switch between two networked video sources. At the QSC booth, attendees will notice how Q-SYS controls the video switching and pulls the appropriate audio stream from the network and mixes audio from other sources.

About QSC

QSC is a globally recognized manufacturer of audio, video and control solutions for huddle rooms to stadiums—and everything in between. Our systems make it easy for your team to design and integrate flexible, scalable solutions and deliver the native IT integration and standards-based technology your customers expect. This is AV built for IT.

About Atlona

Atlona is a leading global manufacturer of AV and IT distribution and connectivity solutions. In an ever-changing industry, the company has been designing and engineering innovative, award-winning products for a diverse range of residential and commercial AV and IT markets, including education, business, government, entertainment, and healthcare.

Atlona's products and services enable system designers, integrators, consultants, and installers worldwide to simplify installation, minimize maintenance and maximize the versatility of premier automated control solutions. Backed by an industry-exclusive 10-year warranty, Atlona's customer-driven products are designed and developed with the features, performance and reliability that leaders demand. More information about Atlona is available at <http://www.atlonacom>. Follow Atlona on Twitter at @Atlona.
