## **Atlona Unveils Dual-Output 4K/UHD HDMI to HDBaseT Distribution Amplifier**

Available immediately, the new AT-UHD-CAT-2 provides a cost-efficient and integration-friendly Ultra HD distribution solution for smaller-scale AV applications

SAN JOSE, California, January 7, 2019 – [Atlona](#) today announced the **AT-UHD-CAT-2**, the latest addition to the company's powerful lineup of HDMI to HDBaseT distribution amplifiers. Bringing all of the integration-friendly features of its larger UHD-CAT Series siblings to smaller AV distribution applications, the new 1x2 UHD-CAT-2 is available immediately and will make its exhibition debut in stand 5-U120 at the upcoming Integrated Systems Europe (ISE) 2019 show (February 5-8 in Amsterdam).

“Our four-output **AT-UHD-CAT-4** and eight-output **AT-UHD-CAT-8** distribution amplifiers have proven very popular for AV environments ranging from retail showrooms and classrooms to restaurants and entertainment venues, but we have received many requests from integrators and end-users for a model with only two outputs,” said Joshua Castro, Atlona product manager. “We’re pleased to meet this demand with the UHD-CAT-2, bringing the same rich feature set to smaller-scale, price-sensitive AV applications.”

The UHD-CAT-2 features one HDMI input, one HDMI pass-through output, and two HDBaseT outputs for distributing 1080p content up to 230 feet (70 meters) or 4K/UHD material up to 130 feet (40m) over category cable. Each HDBaseT output delivers video, audio, remote PoE receiver power, and control signals – including RS-232 and IR, plus CEC for automatic display control – over a single cable, simplifying installation while minimizing cable runs between AV sources, control systems and displays.

The new distribution amplifier supports 4K/UHD video at 60 Hz with 4:2:0 chroma sampling and is HDCP 2.2 compliant, enabling reliable distribution of copy-protected content. The UHD-CAT-2 is compatible with Atlona receiver options including the **AT-UHD-EX-70C-RX**, the **AT-HDVS-200-**

**RX** HD receiver and scaler, and the recently-released **AT-HDVS-SC-RX** 4K/UHD receiver with advanced CrystalScale™ scaling technology.

The UHD-CAT-2 offers TCP/IP, RS-232 and IR control capabilities for flexible integration, and can be remotely configured, managed and monitored over a LAN, WAN or VPN with the Atlona Management System (**AMS 2.0**) software or Atlona's innovative, IP-based **Velocity™** AV control platform.

The UHD-CAT-2 is now shipping and is backed by Atlona's award-winning 10-year limited product warranty, ensuring long-term reliability, performance and confidence for integrators and users.

### **About Atlona**

Atlona is a leading global manufacturer of AV over IP distribution, connectivity, and control solutions. In an ever-changing industry, the company has been designing and engineering innovative, award-winning products for a diverse range of residential and commercial AV and IT markets, including education, business, government, entertainment, and healthcare.

Atlona's products and services enable system designers, integrators, consultants, and installers worldwide to simplify installation, minimize maintenance and maximize the versatility of premier automated control solutions. Backed by an award-winning 10-year warranty, Atlona's customer-driven products are designed and developed with the features, performance and reliability that leaders demand. More information about Atlona is available at <https://atlona.com/>. Follow Atlona on Twitter at @Atlona.
